
Balancing Risks

Developing Stress Control Policy

LCDR Bonnie Chavez, PhD
Leanne Braddock, LMFT (CDR USN Ret)
Steve Holton, CNOCMC(SS) (Ret)

Introduction

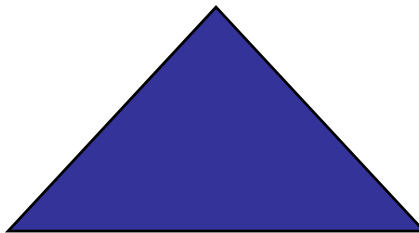

- “A ship in the harbor is safe but that’s not what ships are for” ?
- Every policy choice has benefits and risks.
- A matter of balancing risks.

SCREENING VS RETENTION

| | Mission Capable | Not Mission Capable |
|------------------|-----------------|---------------------|
| Screen = OK | Desired State | Missed Concern |
| Screen = Problem | False Screen | Averted Concern |

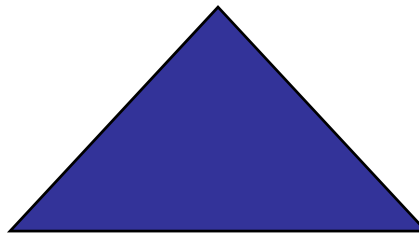

NORMALIZATION VS EMPHASIS

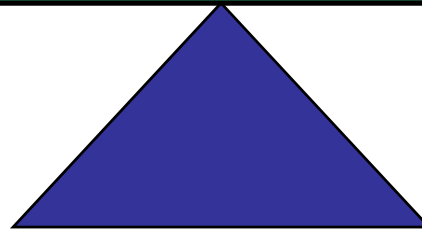

Stress reactions are normal
and will resolve in time

Stress injuries need
attention

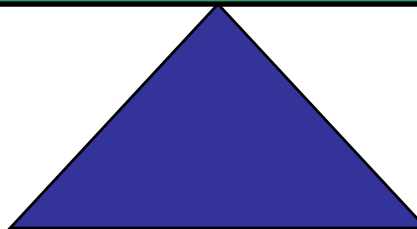

SECURITY VS ACCEPTABILITY

COMMUNICATION VS CONFIDENTIALITY

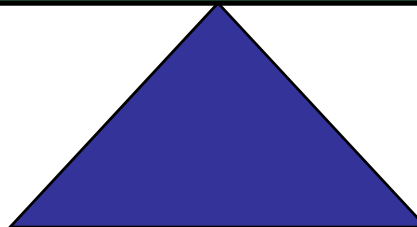

ACCESS VS BOUNDARIES

Imbedded
Providers
and
Consultants

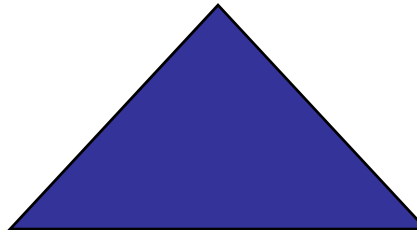

Ethical and
Therapeutic
Boundaries

STANDARDIZATION VS FLEXIBILITY

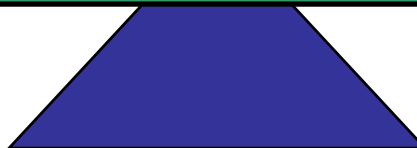

Protecting vs. Challenging

Injury prevention

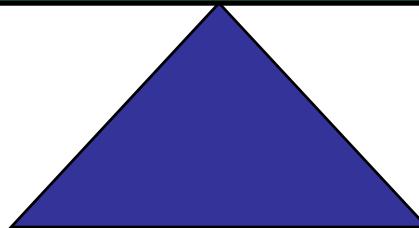

Tough training

HEALING TIME VS MISSION

Questions and Discussion
